Santa Coloma de Farners. The City

4

- Santa Coloma benefits from a transitional orography: from the urban center towards the east begins the Selva plain, while towards the west are the Guillerries, with the foothills of l'Espinau, Santa Bàrbara, and the Serra del Corb. In this semi-circle of mountains there are a whole flock of hermitages of great historical, artistic and religious interest, which are well worth a visit, scattered over hills, valleys, passes and ravines.
- The first written reference is in 886, when the site of Sauleda is mentioned, while in 950 Bishop Gotmar of Girona consecrated the new church, destroyed years ago by Hungarian soldiers. The castle of Farners also dates from this period, which had the functions of a lookout to control the road from Osona to Girona, and a refuge against possible one-off attacks. The first mention of the name Farners is in the middle of the 11th century when Ramon Folc de Cardona offers the castle to the Count of Barcelona Ramon Berenguer I; the castlans were the family of the Farners.

GASTRONOMY

It is worth highlighting in their specialties the "Galetes i Teules", "Coca de Ratafia", the "Coca de Farners" and of course, the world-renowned "Ratafia" Liqueur made from the maceration of various fruits, herbs and spices in alcohol of base, generally aguardent. This ratafia is created from the oldest documented ratafia recipes in Catalonia, written by Francesc Rosquellas in 1842 at Santa Coloma de Farners.

THE CASTLE

CASTELL DE FARNERS

Located about 4.5 kilometers from the urban area. It was restored in 2002, but its origins date back to the 10th-11th centuries, although it was renovated in the 14th-15th centuries. The interior of the castle preserves the sovereign tower, 12 meters high.

PARTY

The Major Festival of Santa

Coloma de Farners is on September 24. It is celebrated to honor the day on which the Colomenc Saint Dalmau Moner will die, who was a hermitage and a Dominican monk from the Girona convent.
